### PROFESSIONAL SKILLS

- JavaScript
- Ruby on Rails
- HTML
- CSS/ SCSS
- Bootstrap
- Github
- React JS
- Agile workflow
- Figma
- Adobe Photoshop
- UI/ UX
- GIT
- Redux
- RESTful APIs
- Test Driven Development (TDD)
- End-to-end (E2E) Testing- Cypress
- Heroku
- Plvotal Tracker

### EXPERIENCE

#### Front End Developer Office Practicum

**Remote- based in Fort Washington, PA**  
**June 2023-present**

- Built over 100 custom websites for pediatric practices and other medical offices across the United States with Kentico and Duda platforms, building bespoke widgets in JS, HTML, and CSS based on designs made on Adobe Photoshop
- Created documentation with detailed instruction guide for the site buildout process, shared sections for the Duda platform, and processes for connecting and disconnecting data for each site
- Collaborated with project managers, designers, and other developers on best practices for development and communication with clients towards product delivery to increase productivity and speed
- Presented research-based findings on improving efficiency in page-speed and overall quality of user experience surrounding layout and platform use

#### Software Developer Lead Radial Development Group

**Remote- based in Loveland, CO**  
**September 2021-February 2023**

- Utilized frontend and backend technologies (React, Vue, Ruby on Rails, C#, jQuery) for over 10 projects in client web and software solutions
- Implemented testing, PR reviews, and production releases on Github and Heroku
- Contributed to writing production code for greenfield and legacy codebases which included building new features, addressing bugs, writing tests (RSpec and Capybara), and accessing endpoints from the Google Maps and Places APIs for integrating search and location UI in React, Ruby on Rails, PostgreSQL, Node.js, Redux, Lodash, and Sass
- Facilitated weekly meetings with client and team to organize user stories, architecture, and sprint-planning for a new custom messaging platform that utilized data on Google Firebase to create a messaging application between senior living facilities and agents

#### Vocal Coach and Performer Conconart LLC

**Denver, CO**  
**September 2018-September 2021**

- Implemented marketing tools online such as Google targeted ads and built a custom website in Wordpress to target key student demographics
- Constructed a private vocal studio comprised of over 100 pre-teens and adults in various styles of music
- Established a licensing contract for national TV and commercial placements, in addition to being selected as a featured artist for TEDXMileHigh and NPR's All Songs Considered

### EDUCATION

#### Turing School of Software and Design

*Front End Engineering Program (2020-2021)*

- Participated in Student Leadership Committee to foster growth and connection among cohort peers
- 1700+ hours of coursework in fundamental technologies, modern languages, and frameworks for web development
- Collaborated on 12 remote group and pair projects, in addition to 10+ solo projects in Vanilla JavaScript and React

#### University of Northern Colorado

*Bachelor of Music Education K-12 -- Vocal, Piano, General Music (2002-2007)*
